***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to glass substrate machining method, classified in class 29, subclass 603.
  - II. Claims 13-18, drawn to a glass substrate machining method, classified in class 349, subclass 32.
  - III. Claim 19-22, drawn to radio terminal apparatus, classified in class 455, subclass 84.
  - IV. Claim 23-26, drawn to a radio base station apparatus, classified in class 455, subclass 561.
  - V. Claims 27-30, drawn to a radar apparatus, classified in class 701, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Group I is separate and distinct from Group II inasmuch as the matching methods in the 2 Groups of Claims are unrelated; Group I is separate and distinct from Group III inasmuch as Group I method need not be used to make a radio terminal apparatus; Group I is separate and distinct from Group IV inasmuch as the Group I method need not be used to make a radio base station; Group I is separate and distinct from Group V inasmuch as the Group I method need not be used to make a radar apparatus; Group II is separate and distinct from Groups III, IV and V because Group II is unrelated to the Groups III, IV and V is unrelated to Group VI.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches are divergent, the restriction for examination purposes is proper.

Art Unit: 3723

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i)
